

CENTRAL GARDENS NEIGHBORHOOD ARBORETUM

The Central Gardens Association has established its neighborhood as a Level 3 Arboretum. This designation is endorsed through the Tennessee Arboretum Certification Program established by the Tennessee Urban Forestry Council and the Tennessee Federation of Garden Clubs.

With the purpose of the Central Gardens Neighborhood Arboretum being to promote the preservation of our many fine trees while providing public education, this pamphlet has been created. The map to the left displays the boundaries of the neighborhood while the list on the back provides detailed information about the genus, species and location of each tree.

We hope that you enjoy your tour through our Arboretum and would like to thank you for your interest.
